

Indoor Vertical Apartment Compactor

brought to you by...*FRG Waste Resources, Inc*

The most efficient and sanitary trash compactors for high-rise buildings on the market today.

FRG's Indoor Vertical Trash Compactors with automatic rear chutes offer the most sanitary trash compaction systems available for use with trash chutes in multi-story buildings.

Both the 45SSFC and 70SSFC offer superior design and construction using stainless steel throughout. They are designed to fit under standard trash chutes and are available with a standard wedge hopper with a heavy duty shock plate or an optional vertical feed chute.

Trash is automatically compacted into an easily handled compaction cube lined with a heavy-duty plastic bag. A cube-full indicator system alerts the staff when it is time to remove a cube. Full bags are sealed and disposed of in a standard trash bin/dumpster.

Model 70SSFC shown with standard rear hopper

Both the 45SSFC and 70SSFC provide significant savings in trips to the dumpster, fewer pickups by the hauler, improved security, easier housekeeping, superior sanitation and a quick return on your investment. Easy and safe to use the units are equipped with safety interlocks and key-locked controls preventing unsafe operation. Both models have UL Listed control panels.

Standard Features

1. Full indicator light & buzzer
2. Locking key switch
3. All stainless steel cabinet
4. Air sanitizer
5. Vertical Feed Chute
6. Heavy door locks
7. Safety door locks
8. Hydraulic ejector
9. UL Listed Control Panel
